

COMMUNITY PROJECTS IN 2018

ACTIVE LIVING

Gildan Glow Run

On November 17, 2018, the Company held the fifth edition of the Gildan Glow Run raising more than USD \$ 48,000 in favor of the six Gildan-sponsored schools in the municipality of Guerra. More than 2,400 people participated in the race / walk, including collaborators, family members,

community groups and strategic partners, who came together to contribute to the education of hundreds of low-income children.

Donation to the Infant Ward of the Mario C. Rivas Hospital

The Leonardo Martínez Valenzuela Hospital received a donation of medical equipment for its surgery ward from Gildan. The equipment, valued at more than US \$520,000, for the new operating rooms at the healthcare center will provide free services to patients in the Northern Region of the country. This new surgical module is expected to perform more than 8,000 surgeries annually.

This donation provides the hospital, which has been operating in the city for more than 110 years, exclusive equipment to assist patients in need of pediatric and gynecological surgery. It will also allow them to improve medical attention of the brigades in these two areas of intervention.

This donation of equipment is part of Gildan's health program, in which the Company has invested more than US \$1.45 million since 2015. These efforts were targeted to the country's largest hospitals, such as the Hospital Escuela Universitario and Hospital San Felipe in Tegucigalpa and the Mario C. Rivas Hospital and Leonardo Martínez Hospital in San Pedro Sula.

Gildan Donates \$570,000 to Refurbish Majoncho Sosa Community Park in Honduras

The “Parques para una Vida Mejor” (Better Life through Parks) program created by the government in partnership with the private sector aims to recover public spaces encouraging citizen coexistence and healthy recreation. This is the 55th park to be inaugurated nationally and the investment of U.S. \$570,000 was donated by Gildan, the largest private employer in the area. The facility features energy efficient LED lighting and has multi-purpose fields, playgrounds, a running track, kiosks for the sale of

food, bathrooms, as well as rest zones and green picnic areas. The creation of these multi-sport recreational areas will offer youth avenues for recreation and positive interaction, leading them towards sports and fitness as an outlet. The parks also serve to provide safe, open spaces where people can pursue physical activity, towards the prevention of disease and overall improvement in the health of the population of Honduras.
