

COMMUNITY PROJECTS IN 2018 ENVIRONMENT

Gildan Nicaragua employees planted more than 5,000 trees during a new reforestation project.

Gildan Nicaragua held its third Reforestation Campaign under the “Sow to Harvest” program, where about 400 volunteers from Gildan San Marcos, Gildan Rivas and ANNIC participated during the months of August and September 2018. The volunteers dedicated a day to contribute to the environment in the community of Rivas.

Gildan Mexico volunteers collect more than half a ton of garbage during beach cleanup.

The volunteers contributed to the cleaning of 250 meters of beach in Ensenada, which is polluted with garbage that needs to be sifted, such as cigarette butts, plastic, coal and pieces of glass, among others. The activity, coordinated in collaboration with the Sub Secretariat of Ecology of Ensenada and Federal, Maritime and Terrestrial Zones (ZOFEMAT), demonstrates the Company's commitment to actively take care of the environment in the communities where it operates.
